HaloPower™

The Halo Power™ is a motorised evacuation chair, designed for upward and downward evacuations. Its 24V Lithium-Ion battery and powered track system reduce manual handling and can be operated by one person. One full battery charge provides enough power for 150 flights of stairs, and its arm and footrests offer additional comfort and support to the passenger. The Halo Power™ has rear handles enabling the evacuation chair to be used as a wheelchair, if required.

1–2 OPERATORS · **353 lb** PAYLOAD · **150** FLIGHTS PER CHARGE · **24V** LI-ION BATTERY

POWERED UP AND DOWN

LIFETIME PROMISE QUALITY ASSURED

INVENTED IN THE USA DESIGNED & MANUFACTURED IN THE UK

Easy to use control pad
Enables the operator to control the speed and direction (upward/downward) of the evacuation.

Arm rests
Provides passenger support and assistance.

Safety belt
Secures the passenger into the Halo Power™.

Footrest
Provides a secure place for the passenger to rest their feet.

Ascending control handles
Enables a second person to assist.

Headrest
Provides passenger comfort and its integrated strap provides additional support.

Pushing handles
Enables the chair to be easily maneuvered on flat terrain.

Powered belt track system
Reduces manual handling and provides a smooth upward/downward evacuation.

24V Lithium-Ion battery
Powers the Halo Power™ upwards and downwards. One full charge lasts for 150 flights of stairs.
